

Established in 2002, CAT TUONG Corporation has emerged as a prominent leader within the Vietnamese insulation materials sector. The company boasts a robust infrastructure, encompassing 4 strategically located factories and a network of 4000 distributor nationally. This extensive operational capacity translates to a daily production output exceeding 20 million square meters of insulation materials, solidifying CAT TUONG's position as a leading industry player.

Project name: CORE 5

Volume: 130,000m² (Hai Phong, Quang Ninh, Hung Yen)

Investor: Indochina Kajima Company Limited (joint venture between Indochina Capital and Kajima Group, Japan)

Cat Tuong's commitment extends beyond mere production volume. The company prioritizes the implementation of sustainable practices throughout its operations, actively working to minimize environmental impact and safeguard human health. This dedication to responsible manufacturing is exemplified by their recent participation in a project of significant scale: supplying high-quality insulation materials for the construction of the brand new Core 5 factories established in Vietnam during 2023-2024 by Indochina Kajima

This collaboration transcends a simple supplier-client relationship. Cat Tuong's involvement reflects their unwavering commitment to supporting the development of 130,000 sqm2 state-of-the-art manufacturing facilities within Hai Phong, Vietnam. Furthermore, the provision of these essential materials contributes directly to the promotion of energy efficiency within Core 5 facilities by ensuring optimal temperature control and minimizing energy consumption, Cat Tuong plays a crucial role in fostering a more sustainable manufacturing environment for Core 5, ultimately contributing to a future characterized by environmental responsibility.
